(c) ₹5.98

(d) ₹5.79

Ans.(d)

Q56. An object is shaped like an ice cream cone, consisting of a hemisphere placed on top of a cone with an identical base radius. The volume of the hemispherical part is 144π cm^3, and the height of the conical part is 8 cm. What is the total surface area of the object?

(a) 132 π cm^2

(b) 108 π cm^2

(c) 60 π cm^2

(d) 168 π cm^2

Ans.(a)

Q57. In a circle of radius 17 cm, two chords are drawn at distances 8 cm and 15 cm from the center. Find the difference between the lengths of the two chords.

(a) 14 cm

(b) 16 cm

(c) 18 cm

(d) 20 cm
Ans.(a)

Q58. The value of $\sin^2\theta + \cos^2\theta - (\sec^2\theta - \tan^2\theta) + \tan\theta\cos\theta - \sin\theta$ is
(a) 0
(b) 4 sin θ cos θ
(c) -1
(d) $\sec^2$ θ
Ans.(a)

Q59. In a right - angled triangle ABC, right -angled at B, if tan A = $\frac{1}{\sqrt{3}}$, the value of (sin A cos C + cos A sin C) is:
(a) 1
(b) $\frac{3}{4}$
(c) $\frac{1}{2}$
(d) $\frac{1}{4}$
Ans.(a)

Q60. A sum of ₹1,000 is invested for 2 years at 10% per annum compound interest, compounded annually. Find the compound interest earned at the end of 2 years (in ₹).

Q61. What is the value of (2x + 7y), if mean of the following distribution is 53?

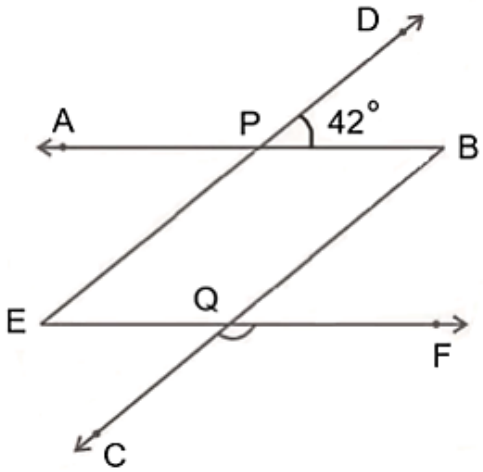

Class	0-20	20-40	40-60	60-80	80-100	Total
Frequency	7	11	x	8	y	60

(a) 137
(b) 127
(c) 133
(d) 151
Ans.(c)

Q62. The surface area of a sphere is numerically equal to the volume of another sphere. If the radius of the first sphere is 7 cm, find the radius (in cm) of the second sphere.
(a) $\sqrt[3]{174}$
(b) $\sqrt[3]{147}$
(c) $\sqrt{147}$
(d) $\sqrt{174}$

Ans.(b)

Q63. In the given figure, AB∥EF, ED∥CB and ∠BPD is 42°. What is the measure of ∠CQF?

(a) 42^0
(b) 142^0
(c) 138^0
(d) 38^0
Ans.(c)

Q64. Yuvraj deposited a certain sum of money at 20% rate of interest per annum, compounded annually. At the end of 2 years, Yuvraj received a total amount of ₹34,668. What was the sum of money deposited by Yuvraj?

Q76. Given below are six sentences taken from a paragraph. The first and the last sentences are numbered S1 and S2 and are placed in the first and last positions respectively and are fixed in their positions. The other four sentences between the first and last sentences are jumbled up and are numbered A, B, C, and D. Rearrange the jumbled sentences in a logical sequence keeping the unity and coherence of the paragraph intact. Choose the correct alternative that best describes the sequence.
S1 Then, one day, she was up, playing; Isabel was in the kitchen fixing lunch for the two boys when they'd come in from school, and she heard Grace fall down in the living room.
A. And she ran to the living room and there was little Grace on the floor, all twisted up, and the reason she hadn't screamed was that she couldn't get her breath.
B. When you have a lot of children you don't always start running when one of them falls, unless they start screaming or something.
C. Yet, Isabel says that when she heard that thump and then that silence, something happened in her to make her afraid.
D. And, this time, Grace was quiet.
S2 And when she did scream, it was the worst sound, Isabel says, that she'd ever heard in all her life, and she still hears it sometimes in her dreams.

Directions (79-83): Read the passage and answer the following questions. The contemporary information economy has generated a paradox that its most enthusiastic proponents rarely acknowledge: the unprecedented circulation of information has not necessarily produced a commensurate expansion of public understanding. Digital infrastructures have dismantled many traditional barriers to knowledge, yet they have also accelerated the dissemination of conjecture, manufactured consensus and ideologically convenient half-truths. The resulting epistemic environment is characterised less by an absolute scarcity of information than by an increasingly formidable difficulty in distinguishing substantiated knowledge from its counterfeit.
This apparent abundance can be (1) ____: an information ecosystem saturated with competing assertions may remain profoundly deficient in independently verified understanding. Claims frequently acquire legitimacy through repetition rather than evidentiary corroboration, while the original provenance of an assertion becomes obscured as it passes through successive layers of commentary, appropriation and retransmission. Consequently, the distinction between primary evidence and derivative interpretation grows increasingly indistinct.
The problem is compounded by institutional incentives that privilege immediacy over deliberation. News organisations competing for dwindling attention, political actors pursuing strategic advantage and digital platforms optimising engagement may all contribute, albeit for different reasons, to an environment in which the velocity of dissemination supersedes the rigour of verification. Within such an environment, provisional conjectures can (2) ____ into seemingly incontrovertible orthodoxies, particularly when they reinforce pre-existing ideological commitments. Contradictory evidence, meanwhile, is frequently dismissed as partisan interference rather than evaluated on its merits.
A further complication arises when the burden of intellectual scrutiny is (3) ____ from those advancing a claim to those questioning it. Instead of requiring proponents to substantiate their assertions, public discourse increasingly demands that sceptics disprove them. This inversion creates fertile conditions for obfuscation, enabling rhetorically sophisticated but evidentially impoverished arguments to survive sustained criticism.
The remedy is not an indiscriminate rejection of digital communication, nor a nostalgic restoration of unquestioned institutional authority. Rather, it requires a renewed commitment to evidentiary transparency, intellectual humility and the institutional protection of dissent. A mature information culture must recognise that the circulation of an assertion is not equivalent to its verification, just as the appearance of consensus cannot substitute for the independent examination of evidence. Without these distinctions, societies risk mistaking informational abundance for epistemic progress.
