SSC CHSL

Syllabus & Exam Structure

A structured preparation guide covering the subject-wise topics, skill/typing-test information and the exam-pattern details contained in the supplied reference material.

Inside this guide

- Tier I subjects: English Language, General Awareness, Quantitative Aptitude and General Intelligence.
- Subject-wise syllabus: key topics listed in the supplied reference.
- Further stages: descriptive-writing and skill/typing-test details as stated in the reference.
- Practice: a direct route to the Tayari24 SSC CHSL Test Series.

Important: The supplied reference includes older exam-stage and pattern descriptions (including a section labelled “Exam Pattern 2020”). Treat those details as reference material, not confirmation of the current SSC CHSL 2026 notification. Always verify the latest scheme from the official SSC notice.

01 | Tier I: Subject-wise syllabus

Tier I is described in the reference as a computer-based written test with four sections.

English Language	Parts of Speech; Tenses; Singular & Plural; Subject–Verb Agreement; Sentence Improvement; Fill in the Blanks; Para-jumbles; Spell Check; Active and Passive Voice; Articles (A, An, The); Direct and Indirect Speech; Phrases and Idioms; Sentence Correction / Spotting Errors; Cloze Test; One Word Substitution; Comprehension Test.
General Awareness	National and International Events / Issues; Countries and Capitals; Indian Polity; Indian Geography; Indian Budget; Science, Technology and Research; Culture; Awards and Honours; Indian Constitution; Indian Economy; Business; Indian Parliament; Indian History.

Preparation pointers

- For English, combine grammar revision with vocabulary, comprehension and regular error-spotting practice.
- For General Awareness, organise revision around static GK and current national / international developments.
- Use topic-wise practice to identify weak areas before moving to full-length mock tests.

tayari24

02 | Quantitative Aptitude

The reference describes this section as a test of numerical and mathematical ability. The listed topics are:

01 Simplification	02 Number Series
03 Percentage	04 Ratio and Proportion
05 Time, Speed and Distance	06 Average
07 Geometry and Mensuration	08 Permutation and Combination
09 Bar Graph	10 Trigonometry
11 Number Systems	12 Square Root
13 Surds and Indices	14 Profit and Loss
15 Simple and Compound Interest	16 Time and Work
17 Pipes and Cisterns	18 Boats and Streams
19 Probability	20 Pie Chart
21 Line Graph	22 Linear Equations
23 Mixture and Allegation	24 Discount

Suggested practice sequence

- Start with arithmetic foundations: number systems, simplification, percentages, ratio, averages and interest.
- Move to application-based chapters: time and work, pipes and cisterns, speed and distance, profit and loss, and mixture.
- Practise data interpretation (bar graphs, pie charts and line graphs) under timed conditions.
- Keep geometry, mensuration, trigonometry, probability and permutation-combination in a separate revision cycle.

03 | General Intelligence

This section focuses on logical ability and analytical thinking. Topics listed in the supplied reference:

01 Number Series	02 Classification
03 Venn Diagrams	04 Problems on Figural Pattern
05 Statements and Arguments	06 Statements and Assumptions
07 Puzzles	08 Coding and Decoding
09 Alphabet Series	10 Analogy
11 Paper Folding	12 Syllogism
13 Statements and Conclusions	14 Assertions and Reasoning
15 Seating Arrangements (Circular and Linear)	16 Word Building
17 Blood Relations	

Practice pointers

- Practise series, analogy, classification and coding-decoding for speed and pattern recognition.
- For puzzles and seating arrangements, draw clear diagrams and track conditions systematically.
- Revise Venn diagrams, syllogism, blood relations and statement-based questions regularly.
- Include non-verbal reasoning such as paper folding and figural patterns in weekly practice.

04 | Other stages mentioned in the reference

The supplied document describes a descriptive-writing stage and a qualifying skill / typing test. These descriptions may reflect an older exam scheme; check the latest SSC notification before relying on them.

Descriptive writing (as stated in the reference)

- Essay topics may relate to social, political, economic or cultural issues.
- Letter / application writing may involve formal or official topics; candidates should be familiar with standard formats.

Skill / typing test details (as stated in the reference)

Data Entry Operator	8,000 key depressions per hour	15 minutes; printed English passage of about 2,000–2,200 key depressions.
DEO in the Office of the C&AG;	15,000 key depressions per hour	15 minutes; printed English passage of about 3,700–4,000 key depressions.
LDC / JSA and PA / SA	10,500 key depressions per hour	15 minutes; printed English matter; the reference mentions about 9,000 key depressions/hour.

Older pattern summary included in the reference

Tier I	Computer-based	English Language, General Intelligence, Quantitative Aptitude and General Awareness.
Tier II	Descriptive paper	Letter / application writing and essay writing. The reference separately mentions essay length of 200–250 words and letter/application length of 150–200 words.
Tier III	Skill test	Typing test; the reference lists 35 wpm (English) and 30 wpm (Hindi).

05 | Tier I marks distribution in the reference

The source document lists four sections with 25 questions and 50 marks each, for a total of 100 questions and 200 marks. It also states a 60-minute duration and 80 minutes for PwD candidates.

English Language	25	50
General Awareness	25	50
Reasoning / General Intelligence	25	50
Quantitative Aptitude	25	50
TOTAL	**100**	**200**

Reference note
The supplied PDF contains historical exam-pattern information and does not establish that these marks, timings, stages or typing requirements are the current SSC CHSL 2026 rules. Confirm all exam details against the latest official SSC notification.

Prepare with a plan

- Create a weekly timetable that gives time to all four Tier I subjects.
- Track accuracy and time taken for each topic, not just the number of questions attempted.
- Use mock-test analysis to identify recurring mistakes and revise weak subtopics.
